AHMED AMINE OUQLANI

ENGINEERING STUDENT – ENSEEIHT, TOULOUSE INP
FIRST YEAR, 3EA DEPARTMENT
ELECTRONICS, ELECTRICAL ENERGY & AUTOMATIC CONTROL

PROFILE

Engineering student in electronics, electrical energy and automatic control, coming from French-system preparatory classes (CPGE, MP track). I am interested in control systems and programming, and I enjoy turning a concrete problem into a solution that works, on my own or in a team.

EDUCATION

2026 – 2027
Engineering degree program, first year – Electronics, Electrical Energy & Automatic Control (3EA)
ENSEEIHT, Toulouse INP – Toulouse, France

2024 – 2026
Preparatory classes for the engineering schools (CPGE), MPSI then MP
Lycée Moulay Youssef (MPSI), then Lycée Zahrawi (MP) – Rabat, Morocco

2023 – 2024
Moroccan Baccalaureate, Mathematical Sciences A – highest honors (18.25/20)
Groupe Scolaire Atlas – Rabat, Morocco

PROJECTS AND AWARDS

- **Winner of the iMSA challenge** – IA for Impact Hackathon 2026
  La Mêlée, Toulouse INP – ENSEEIHT, October 2026
  - Team design of **iMSA Sentinel**, a tool that helps check healthcare invoices: it compares the scanned claim form with the electronic invoice and flags each discrepancy with its evidence.
  - **22 automated checks**, **15 zones** located on the form; image reading (OCR), 100 % local processing (Python, FastAPI, React).
  - AI-assisted development, in a team partly formed on the day; the team was also a close contender for the jury's favorite award.
- **TIPE (supervised research project) – Drone attitude stabilization**: design and comparison of several control architectures.
- **Two open-source web simulators**, built from my courses and my TIPE: Drone Attitude Lab (drone attitude control) and DC-DC Converter Lab (buck and boost converters), each checked by 20 automated tests.
- **Ranked 92nd out of 3,096** in the Concours National Commun (Moroccan national entrance exam to engineering schools), 2026.
- **1st prize in physics** at the Groupe Scolaire Atlas open-day competition (2024).

PUBLICATIONS

Author of five revision books for preparatory-class students (CPGE), written in LaTeX and published online: *Le Collé Chimie*, *Le Collé Mathsup*, *Le Collé Mathspé*, *Le Collé Info* and *Le Collé Maths – Résumé* (chemistry, first- and second-year mathematics, computer science, and a mathematics summary).
